

ACHIRA KURUPPU ACHCHIGE

Software Engineer | Full-Stack Developer

(+94) 74 336 1619 | achiraiduwara@gmail.com | [LinkedIn](#) | [GitHub](#) | Colombo, Sri Lanka

PROFILE

BSc (Hons) Computer Science undergraduate focused on software engineering and full-stack development. Builds Java, Python and JavaScript applications backed by MySQL, applying OOP, clean code and Git-based workflows across the SDLC. Strong testing background that translates into reliable, well-validated software. Seeking a software engineering internship to contribute to real-world product development.

EDUCATION

BSc (Hons) Computer Science

2024 – 2028

Informatics Institute of Technology (University of Westminster), Colombo

G.C.E. Advanced Level — Combined Mathematics

2021 – 2024

Royal Institute International School

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Development: Object-Oriented Programming, Data Structures & Algorithms, REST APIs, Responsive Web UI, Database Design & Optimisation

Databases: MySQL, phpMyAdmin

Tools: Git & GitHub, IntelliJ IDEA, VS Code, Postman, JIRA, Figma, Selenium WebDriver

Practices: SDLC, Agile / Scrum, Version Control, Code Review, Debugging, Unit & Integration Testing

PROJECT EXPERIENCE

Healthcare Appointment Management System

Java, MySQL, HTML, CSS

- Engineered a multi-role web platform for patients, doctors and administrators covering registration, booking, scheduling and cancellation.
- Designed the relational schema and wrote optimised SQL queries for appointment and patient data integrity.
- Implemented user authentication, input validation and error handling; verified flows with unit and integration tests.

Bank Management System

Java, MySQL, HTML, CSS

- Built account management and transaction modules using OOP design, with transactional consistency enforced at the database layer.
- Developed and executed 20+ test cases and resolved defects to harden core banking functionality.

Earth Pulse — Climate Awareness Web App

HTML, CSS, JavaScript, Python, MySQL

- Developed a responsive, multi-page front-end with dynamic JavaScript components and a Python/MySQL data layer.
- Collaborated in an Agile team using GitHub for branching, code review and release delivery.

Smart Campus API

Java

- Backend API project exploring REST endpoint design, request validation and a clean service-layer structure.

- Version-controlled on GitHub with iterative commits and Postman-tested endpoints.

Repository: github.com/achira20240081/smart-campus-api

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Web Design for Beginners — University of Moratuwa (Open Learning Platform): HTML, CSS and responsive layout fundamentals.
- Software Quality Assurance Using Test Automation Framework — University of Colombo School of Computing (Jun – Aug 2026).
- Currently deepening backend development, REST API design with Postman and test automation with Selenium WebDriver.

CORE COMPETENCIES

Problem Solving | Analytical Thinking | Attention to Detail | Team Collaboration | Communication | Adaptability | Fast Learning | Time Management
